

May 11, 2026

Chicago — *Consulting-Specifying Engineer* is proud to announce the recipients of the 2026 40 Under 40 award. This annual program recognizes 40 outstanding professionals 40 or younger who are making significant contributions to the nonresidential building industry through their leadership, dedication and innovation — both professionally and personally. Individual profiles of the honorees are available at www.csemag.com/40under40.

Nominees were submitted by peers or mentors and evaluated by a panel of industry experts across nine key areas, including academic achievements, professional accomplishments, community involvement and personal growth. The May print and digital editions of *Consulting-Specifying Engineer* showcase each winner, spotlighting their recent projects, industry impact and the qualities that set them apart.

Award recipients will be formally recognized at a celebration in October 2026.

“The 2026 40 Under 40 winners continue to raise the bar for their brilliance in the building, engineering and design fields,” said Amara Rozgus, Editor-in-Chief of *Consulting-Specifying Engineer*. “Now in its 19th year, the program remains a powerful look at emerging talent in the building and engineering fields.”
